

# CARRIAGE

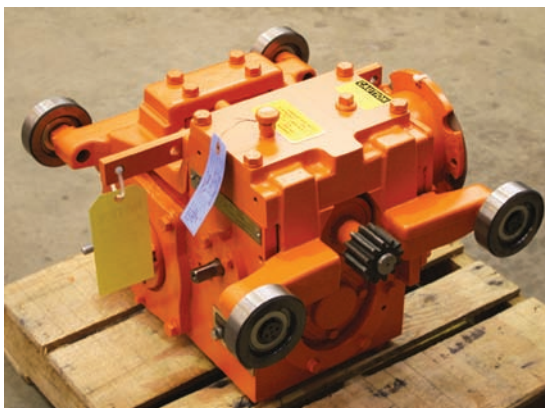

## IK525/525R/545/600/IKSD Sootblower Carriage Assemblies

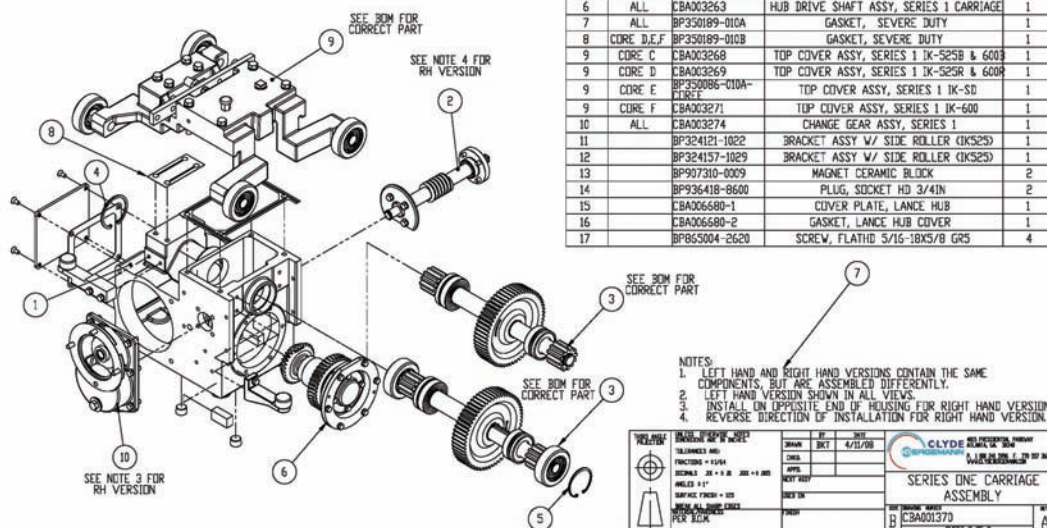

The maintenance cost of the IK525/525R/545/600/IKSD carriage assemblies are a significant portion of the general maintenance cost throughout the life of these sootblowers. With today's tighter budgets and the rising cost of parts, it has become increasingly difficult to perform the required maintenance within budget. Clyde Bergemann recognizes this and has implemented a program to reduce the price of complete carriage assemblies, as well as the price of the individual carriage replacement parts. Quality and value are the cornerstones of this program, and we offer our full one-year warranty covering both workmanship and materials.

### Carriage Replacement Program

Whether you are considering rebuilding your carriages or purchasing new ones, Clyde Bergemann's replacement program consists of supplying a completely new carriage at a very competitive price. This program includes the carriage assemblies for IK525B, IK545B, IK525R, IKSD, and IK600, including the Series 1 style gearboxes.

Additionally, you will save in shipping costs since you will no longer have to ship your damaged or worn-out carriages to a rebuild facility.

# CARRIAGE

## IK525/525R/545/600/IKSD Sootblower Carriage Assemblies

### Benefits

- Receive new carriages at rebuild price
- Full factory warranty
- Shipment in most cases within one week
- Saves freight costs
- Upgrades and options available
- Dual bushing upgrade
- Automatic Packing Tensioner (APT)
- PERMALUBE style (permanently lubricated for life)

To obtain a new replacement carriage, you simply need to provide the following information:

- Hand
- Feed tube size
- Speed
- Helix
- Lubrication style

For Series 1 gearboxes, the quantity and size of the rollers are also required.
